

In the following you should test our web-application, which shows companies' job postings. Be informed that not everything may be working yet. In the following you will receive different tasks. Tasks have to be done in the given order. While you try to execute them, speak aloud what you are doing right now and what you are thinking.

1. Have a look at the different job postings.

Search for a job that requires a masters degree (i.e. keyword „master“). Have a closer look at the corresponding job posting.

Go to the according companies website if you are interested.

2. Register as a company. Log in, have a look at your account page and some job postings.

Log out.

3. Log in with email „adidasmail@mail.ch“ and password „adidas“.

Create a new job posting. Look over all of your job postings. Sort the according to approvement status.

Edit one job posting that was rejected, so that it will be approved by an admin. Delete the other one.

Also edit the already approved job posting „CEO Sportartikelunternehmen“, now, the second language should be „Mandarin“.

Change your password to „ad1das“. Enter your own name as a contact person.

Log out.

4. Log in with email „admin“ and password „1234“.

Verify adidas, as they have a new contact person.

Reject the company „TheBest“ for the obvious reasons.

Approve one job posting and reject one.

Log out.

5. Log in with email „baduser@gmx.com“ and password „bad“.

Change account description in order to get verified.

Log out.

Team 6 thanks you for your help in our development process.
